SAFETY POLICY			IDO250070

Quandum Aerospace objective is to provide the highest standards of safety, quality, and service to our customers. We will constantly strive to improve these standards. Outstanding safety performance is critical to the success of our business.

Through our positive safety culture, Safety Risk Management, and policy of continuous improvement, we will maximize the inherent safety of our operations by promoting best practices in product/aviation safety to achieve Quandum high-level product/aviation safety objectives:

- Design of safe products;
- Superior continued operational safety;
- Proactive employee participation in product/aviation safety and hazard reporting;
- Inherent compliance to processes, procedures and policies associated with the design, and continued operational safety of Quandum Aerospace products;
- Comprehensive safety risk management of compliance and conformity assurance processes.

The leadership of Quandum Aerospace commits to providing the necessary resources to ensure implementation of Safety Culture and promotion fundamentals, and will:

- Consult, listen, communicate, and respond openly to our staff and customers;
- Ensure personnel competence and accountability. Everyone employed at Quandum is responsible for operating appropriately and demonstrating compliance with this policy and company processes and procedures at all times;
- Actively engage in Safety Risk Management and Safety Assurance activities;
- Openly report all aspects of our safety performance;
- Recognize those who contribute to improve product safety performance;
- Ensure that a positive safety culture is maintained at all times.

Safety is not the sole responsibility of any single person or department, it involves all employees in the company, and it is the responsibility of all of us to comply with this policy and to strive to improve our safety standards at every opportunity.
